

SRT Recommended Electric Massage Tables

So you are interested in purchasing an electric table...

An electric table can really save your body. There are many brands and companies to choose from and most of them look similar, but beware; many of these tables are look-alikes or knock-offs with motors made in China which do not hold up and are expensive to replace! Also, the company you buy them through may not be there tomorrow.

Oakworks is one of the oldest companies supplying massage tables. You can feel confident purchasing these tables and with the customer service Oakworks provides.

Why order an SRT recommended table?

Navigating the Oakworks website can be complicated and confusing because the tables are presented as Spa tables. I have put together the best features these tables offer with a comparison chart on page 5. Also, because I have owned one since 2003, I can recommend their reliability.

Why order through Massage Kneads?

I have worked with several companies and found Lisa's customer service to be the best! You cannot order directly from Oakworks but instead must order through one of their authorized dealers. Call or email Lisa and find out what she can do for you.

To place your order, contact:

Lisa Guilloty
